Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/898,894

Applicant(s)

WATANABE ET AL.

Examiner

Etienne P LeRoux

Art Unit

2161

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 July 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-37 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-37 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 03 July 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

Continued Examination

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/15/2004 has been entered.

Claim Objection

Claim 37 is objected to because of the following informalities: Claim 37 recites "said electromagnetic signals carrying instructions for execution on a processor for the practice of the method of claim 10 and 26." Appropriate correction is required. i.e., claims 10, 26 should be recited in the alternative.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 8-24 and 26-37 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat No 5,440,726 issued to Fuchs et al (hereafter Fuchs '726).

Claims 1, 20, 26 and 31:

Art Unit: 2161

Fuchs '726 discloses:

- a log in the backup memory containing storage system transaction entries accumulated after a consistency point at which time results of the transaction entries are committed to the disk array [col 3, lines 28-33]
- an initiator process that establishes a swarm of messages with respect to the transaction request entries and delivers the swarm to the file system [abstract],
- and a disk information retrieval process in the file system that is carried out on the swarm of messages in parallel [Fig 1, items 50, 52, 54 and col 5, lines 57-65]

Claims 2:

Fuchs '726 discloses wherein each of the messages of the swarm is identified by a transaction block including a pointer to one of the transaction request entries in the log, respectively, and a state that indicates whether each of the messages is one of (a) newly transferred to the file system [col 3, lines 17-26].

Claims 3, 23, 29 and 34:

Fuchs '726 discloses wherein the prerequisite event is completion of the load phase and a modify phase with respect to another of the messages [col 14, lines 11-32]

Claims 4, 24, 30 and 35:

Fuchs '726 discloses wherein the initiator process is adapted to retransfer each of the messages incapable of being subject to a load phase until the prerequisite event occurs to the file system for completion of the load phase after the prerequisite event occurs respectively [col 16, lines 39-53]

Claim 8:

Art Unit: 2161

Fuchs '726 discloses wherein the backup memory comprises a non-volatile random access memory (NVRAM) [col 3, line 5].

Claim 9:

Fuchs '726 discloses wherein the storage system comprises a network storage appliance [title]

Claims 10, 36 and 37:

Fuchs '76 discloses:

- accumulating in a log in the backup memory, storage system transaction request entries after a consistency point at which time results of the transaction request entries are committed to the disk array [col 3, lines 28-33]
- establishing a swarm of messages with respect to the transaction request entries and delivering the swarm to the file system [abstract] and
- performing a disk information retrieval process of the file system o the swarm of messages in parallel [Fig 1, items 50, 52 54 and col 5, lines 57-65].

Claim 11:

Fuchs '726 discloses wherein each of the messages of the swarm is identified by a transaction block including a pointer to one of the transaction request entries in the log, respectively, and a state that indicates whether each of the messages is one of (a) newly transferred to the file system [col 3, lines 17-26].

Claim 12:

Fuchs '726 discloses wherein the prerequisite event is completion of the load phase and a modify phase with respect to another of the messages [col 14, lines 11-32]

Art Unit: 2161

Claim 13:

Fuchs '726 discloses wherein the initiator process is adapted to retransfer each of the messages incapable of being subject to a load phase until the prerequisite event occurs to the file system for completion of the load phase after the prerequisite event occurs respectively [col 16, lines 39-53]

Claim 14:

Fuchs '726 discloses wherein the storage system comprises a network storage appliance [Fig 1, item 12 and col 5, lines 57-65]

Claim 15:

Fuchs '726 discloses:

- accumulating in a log in the backup memory, storage system transaction request entries after a consistency point at which results of the transaction request entries are committed to the disk array [col 3, lines 28-33]
- establishing a swarm of messages with respect to the transaction request entries and delivering the swarm to the file system [abstract] and
- performing a disk information retrieval process of the file system on the swarm of messages in parallel [Fig 1, items 50, 52 and 54, and col 5, lines 47-65].

Claim 16:

Fuchs '726 discloses:

establishing for each of the messages of the swarm, a transaction block including a pointer to one of the transaction request entries in the log, respectively, in the log and a state that indicates whether each of the messages is one of :

Art Unit: 2161

(a) newly transferred to the file system [col 3, lines 17-26],

Claim 17:

Fuchs '726 discloses wherein the prerequisite event is completion of the load phase and a modify phase with respect to another of the messages [col 14, lines 11-32]

Claim 18:

Fuchs '726 discloses wherein the initiator process is adapted to retransfer each of the messages incapable of being subject to a load phase until the prerequisite event occurs to the file system for completion of the load phase after the prerequisite event occurs respectively [col 16, lines 39-53]

Claim 19:

Fuchs '726 discloses wherein the storage system comprises a network storage appliance [Fig 1, item 12 and col 5, lines 57-65].

Claims 21, 27 and 32:

Fuchs '726 discloses each of the messages of the swarm is identified by a transaction block including a pointer to one of the transaction request entries [col 3, lines 17-26].

Claims 22, 28 and 33:

Fuchs '726 discloses a state that indicates whether each of the messages is one of (a) newly transferred to the file system [col 3, lines 17-26].

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2161

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuchs '726 in view of Pub No 2003/0131190 issued to Park et al (hereafter Park '190).

Claims 5 and 25:

Fuchs '726 discloses the elements of claims 4 and 20 as noted above.

Fuchs '726 fails to disclose wherein the initiator is adapted to establish a skip state with respect to a skipped messages for which a portion of the disk array associated therewith is unavailable, the skip state thereby omitting the skipped messages from the swarm

Park '190 discloses wherein the initiator is adapted to establish a skip state with respect to a skipped messages for which a portion of the disk array associated therewith is unavailable, the skip state thereby omitting the skipped messages from the swarm [paragraph 9].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Fuchs '726 to include wherein the initiator is adapted to establish a skip state with respect to a skipped messages for which a portion of the disk array associated therewith is unavailable, the skip state thereby omitting the skipped messages from the swarm as taught by Park '190.

The ordinarily skilled artisan would have been motivated to modify Fuchs '726 per the above for the purpose of purpose of skipping defective sectors [paragraph 9].

5. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuchs '726 in view of US Pat No 6,330,570 issued to Crighton (hereafter Crighton '570).

Art Unit: 2161

Claim 6:

Fuchs '726 discloses the elements of claim 4 as noted above.

Fuchs '726 fails to disclose wherein the file system includes a panic state adapted to alert an operator if a message received from the initiator in the swarm is a message incapable of being subject to a load phase until a prerequisite event occurs.

Crighton '570 discloses a failure in reading a file or writing the file to the backup apparatus triggers a warning message [col 2, lines 34-36].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the combination of Fuchs '726 and Crighton '570 to obtain wherein the file system includes a panic state adapted to alert an operator if a message received from the initiator in the swarm is a message incapable of being subject to a load phase until a prerequisite event occurs.

The ordinarily skilled artisan would have been motivated to modify the combination of Fuchs '726 and Crighton '570 as per the above for the purpose of alerting an operator if a backup has not been successfully completed [col 2, lines 26-30].

Claim 7:

Fuchs '726 discloses the elements of claim 4 as noted above.

Fuchs '726 fails to disclose wherein the file system includes a panic state adapted to alert an operator if a message is retransferred by the initiator process is a message incapable of being subject to a load phase until a prerequisite event occurs.

Crighton '570 discloses a failure in reading a file or writing the file to the backup apparatus triggers a warning message [col 2, lines 34-36].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the combination of Fuchs '726 and Crighton '726 to include wherein the file system includes a panic state adapted to alert an operator if a message is retransferred by the initiator process is a message incapable of being subject to a load phase until a prerequisite event occurs.

The ordinarily skilled artisan would have been motivated to modify the combination of Fuchs '726 and Crighton '570 as per the above for the purpose of alerting an operator if a backup has not been successfully completed [col 2, lines 26-30].

Response to Arguments

Applicant's arguments filed 7/15/2004 have been fully considered but they are not persuasive.

Applicant states on the second paragraph on page 12 "Applicant respectfully urges that Fuchs does not show Applicant's claimed novel initiator process that establishes a swarm of messages ... a disk information-retrieval process in the file system that is carried out on the swarm of messages in parallel. Fuchs works on his messages in series, one after the other."

Examiner is not persuaded. Examiner has clearly referenced Fuch's teachings in supra Office Action which are relevant to above claim limitation. The following, column 5, line 65 through column 6, line 5 is one of a plurality of references by Fuchs to parallel processing: In one embodiment, one or more nodes in the fault tolerant computing system 5, such as the node 10, are embodied as parallel processing units, such as a parallel processing workstation, capable

Art Unit: 2161

of executing a plurality of concurrent processes. Each processing unit 50, 52 54 executes a concurrent process, such as processes Po through Pn and Pa.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Etienne LeRoux whose telephone number is (571) 272-4022.

The examiner can normally be reached on Monday – Friday from 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Safet Metjahic, can be reached on (571) 272-4023.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-2100.

Etienne LeRoux
